

Installation

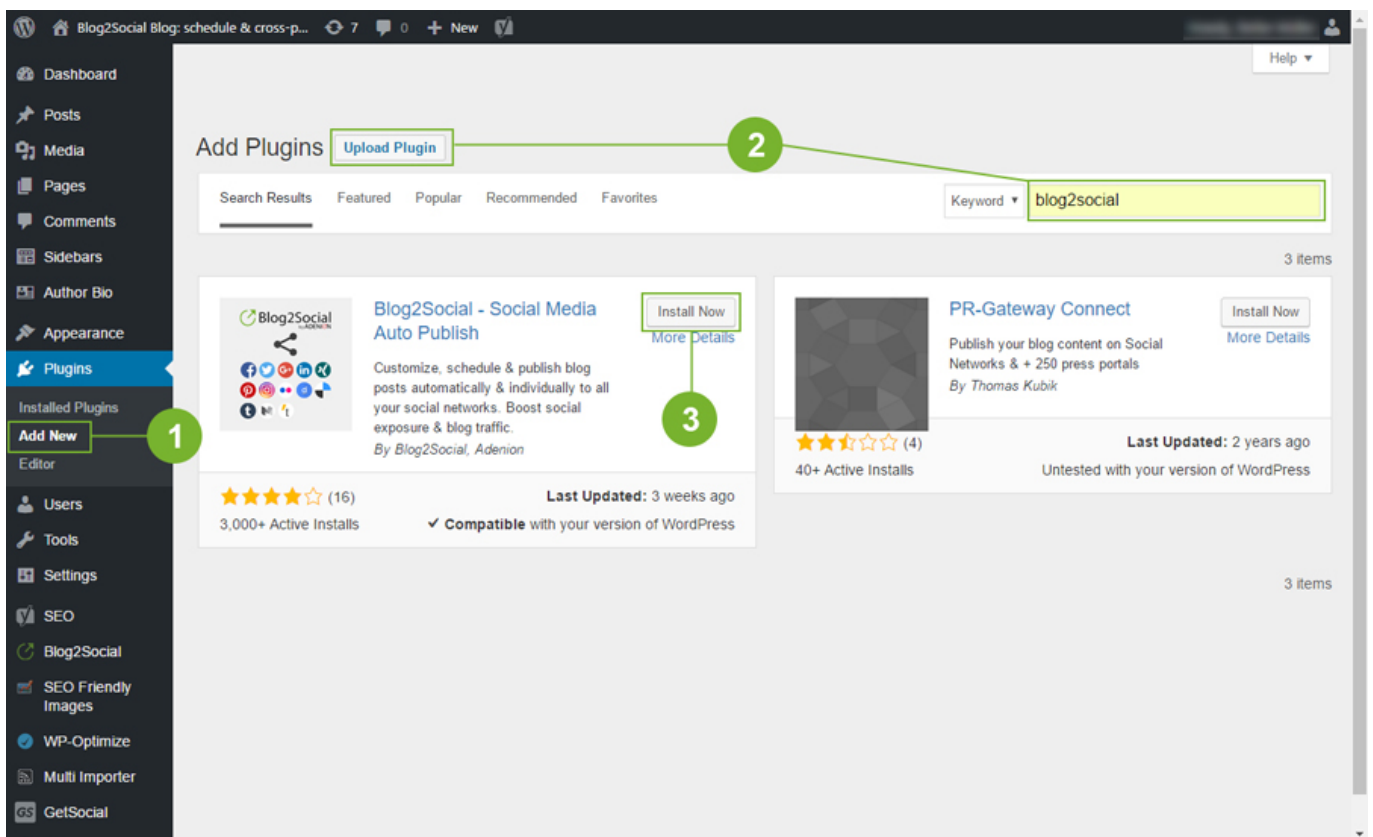

How do I install Blog2Social?

You can either download the [ZIP file from WordPress](#) by clicking "**Download**" or install the plugin directly from the WordPress admin panel.

Once you have downloaded the ZIP-file, just upload it to your blog ("**Plugins**" -> "**Add new**" and click "**Upload Plugin**" in the upper left, then click "**Install**").

If you download Blog2Social from your WordPress administration panel click on "**Plugins**" -> "**Add new**" and enter "**blog2social**" in the search field in the upper right corner, then click on "**Install Now**".

Now it appears in the left hand side navigation menu.

A [comprehensive manual for installing and using Blog2Social](#) is available on the Blog2Social website.
