

# Billing, Payments and Refunds

## Is reverse charge applied for EU businesses?

Yes. For EU businesses, the reverse-charge mechanism is applied if a valid EU VAT ID was provided when ordering Blog2Social.

This process is handled automatically by PayPro Global, our authorized payment provider.

VAT is calculated based on the billing and tax information entered during checkout and in accordance with applicable tax regulations.

The VAT ID field is available on the booking page in the "**Business Purchase**" section, where you can enter your VAT ID to receive a VAT-free invoice as a business customer.

To add or update your VAT ID for existing or future orders, please contact PayPro Global Customer Care directly: <https://cc.payproglobal.com/customer/Support>

If an invoice has already been issued, VAT details cannot be changed. In this case, please contact PayPro Global Customer Care for clarification:

<https://cc.payproglobal.com/customer/Support>

### **PayPro Global login:**

<https://cc.payproglobal.com/Account/Login>

You can log in to your PayPro Global customer account using the email address used during your Blog2Social purchase. If needed, you can reset your password here:
