## How to create a professional X (Twitter) Profile

Similar to Instagram, you can create a professional X profile as a creator or business. A professional profile displays a business category so users can directly see what your business offers.

### Example

The image shows a screenshot of a professional X (Twitter) profile for 'Blog2Social'. The profile header includes the name 'Blog2Social', the handle '@Blog2Social\_com', and a bio: 'Schedule & share your content on 20 social networks 📣 Join more than 70.000 happy users ★ Tips & Checklists: [prg.li/crisis-communicati...](https://prg.li/crisis-communicati...)'. The profile category is 'Software Application', which is highlighted with a red box and a red arrow. The location is 'Munich, Germany' and the account was 'Joined September 2015'. The profile shows '3,889 Following' and '4,715 Followers'. The background features a green and white design with social media icons and the text 'Smart Social Media Automation' and 'Schedule and share your posts automatically across multiple social networks'.

### Why is a professional X (Twitter) Profile important?

A professional X profile helps you build your personal brand, connect with industry professionals and establish credibility in your field. A well-optimized profile increases your visibility and engagement.

With a professional profile, you can also use QuickPromote, which allows you to quickly post ads. This works by promoting one of your published tweets. To do this, you can specify the duration, budget and target audience in just a few seconds.

# Connecting Social Networks

With a professional X profile, you will benefit from many more exclusive features in the future.

## How do I set up a professional X (Twitter) Profile?

Before you connect your professional X profile with Blog2Social, you need to set it up.

- 1) Go to your X profile. Click on "**Edit Profile**".
  - a) Make sure your profile is complete: Account name, bio and profile picture.
  - b) Do not use profiles for animals, fictional characters, fan or fake accounts.
- 2) Scroll down, click on "**Switch to professional**".

Add your date of birth

**Switch to professional**

3) Click "**Agree and continue**" to accept the terms of use.

4) Next, select the category for your profile. Note that there are more categories than the ones shown here. Use the search bar and enter your desired category.

# Connecting Social Networks

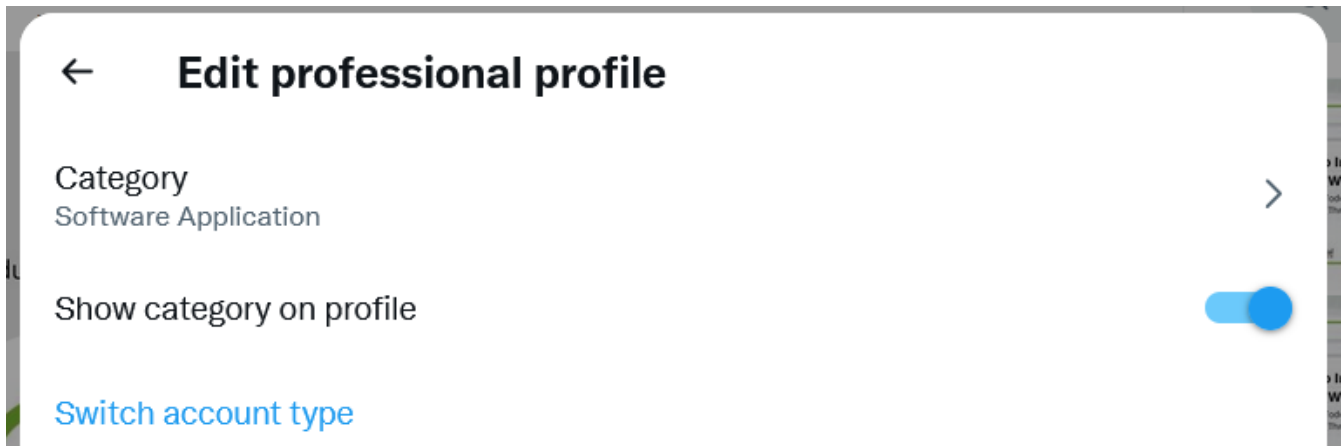

5) Then choose between a company or creator account. There is no difference in functionality so far.

6) That's it! Your professional profile is set up and the desired category is displayed in your profile.

If you want to use the professional profile without displaying the category in your profile, just click on "**Edit profile**" again, then on "**Edit professional profile**". Under this menu item you can also switch between Creator, Business and normal profile or change your category.
