

Auto-Posting, Sharing and Re-Sharing

How to auto-post imported RSS feeds and blog posts on Social Media

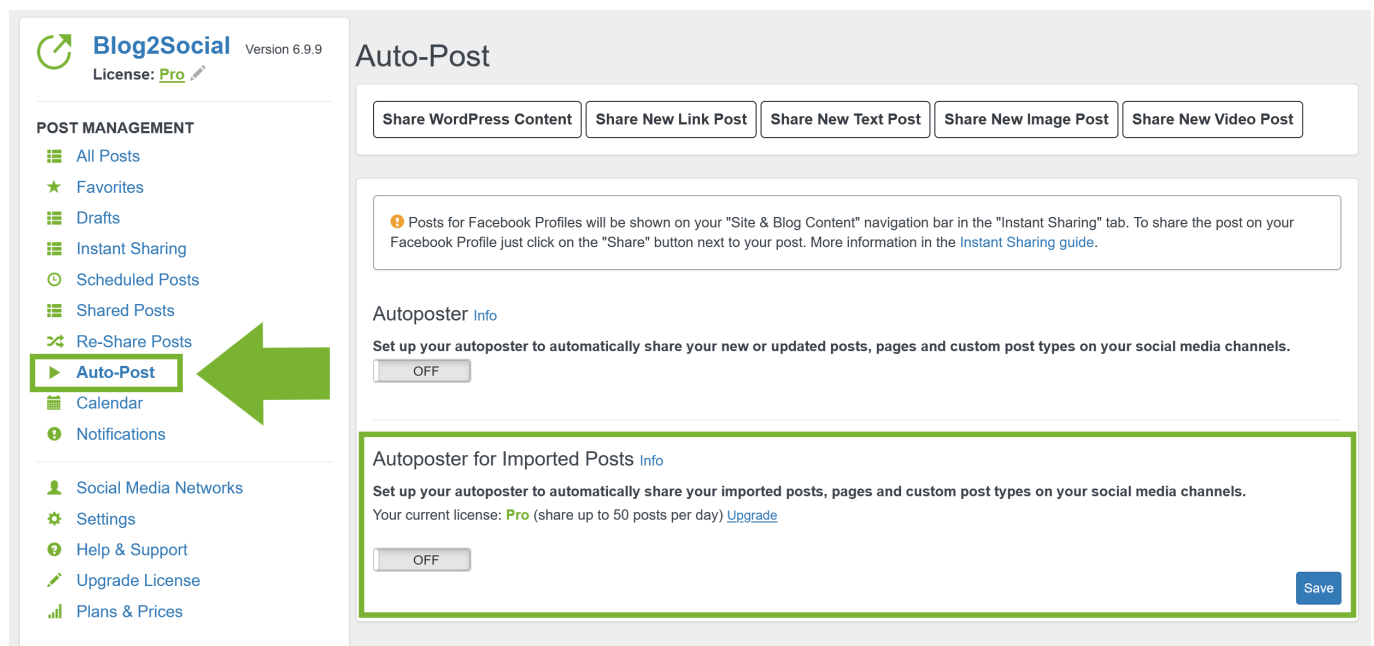

The Blog2Social Auto-Poster makes it easy to distribute imported posts across your social media accounts. With its smart automation features, you can effortlessly share imported posts, including those created by other plugins or RSS feeds, to save time and expand your reach. This way, you can effortlessly share RSS automatically and keep your social media profiles active and engaging.

Simply share your imported WordPress content on the following social media networks:

- **Facebook**
- **Google Business**
- **LinkedIn**
- **Telegram**

- **X / Twitter** ([X Add-on](#) required)

Start by clicking on "**Auto-Post**" in Blog2Social.

The screenshot displays the Blog2Social interface. On the left, the 'POST MANAGEMENT' sidebar lists various options, with 'Auto-Post' highlighted in a green box and a green arrow pointing to it. The main area is titled 'Auto-Post' and features several buttons: 'Share WordPress Content', 'Share New Link Post', 'Share New Text Post', 'Share New Image Post', and 'Share New Video Post'. Below these is a notification box about Facebook profiles. The 'Autoposter Info' section has a toggle switch set to 'OFF'. The 'Autoposter for Imported Posts Info' section is highlighted with a green border and also has a toggle switch set to 'OFF' and a 'Save' button.

Since Blog2Social works WordPress user based, please make sure that each WordPress user or author whose posts should be auto-posted:

- 1) is activated with your license key ([How do I activate my license key?](#))
- 2) has the social media accounts connected ("Blog2Social" -> "Networks")
- 3) has the auto-poster configured

Auto-Posting, Sharing and Re-Sharing

To import blog posts via RSS feeds, you can use a specialized RSS feed plugin that imports the RSS posts as blog posts into your WordPress backend.

There are various settings in your auto-poster for imported posts. For example, you can decide if you want to publish your imported content immediately or with a delay. In addition, you can apply your preferred filters for specific post types or enable your [Blog2Social post templates](#).

Depending on your Blog2Social license, the Auto-Poster for imported posts supports 25 (Smart), 50 (Pro) or 100 (Business) posts per day.

Which RSS import plugins are supported by Blog2Social?

There is a multitude of plugins that can import RSS feeds and you can easily install one of them in your WordPress backend. Blog2Social is generally compatible with page builder plugins that follow the official WordPress rules and conventions.

The following RSS feed plugins have been specifically tested for our customers:

- [WPeMatico](#)
- [RSSImporter](#)
- [WordPress Importer](#)

Auto-Posting, Sharing and Re-Sharing

- [RSS Post Importer](#)
- [WordPress Automatic Plugin](#)
- [WP Content Pilot](#)
- [WP RSS Aggregator](#)

If you need any assistance with other page builder plugins you are using, please do not hesitate to contact us.

[>> Contact Blog2Social <<](#)

These plugins save the posts from your selected RSS feeds as drafts or - depending on your settings - publish them on your WordPress blog as soon as they are imported. With the Blog2Social Auto-Poster, these imported blog posts are automatically shared on your social media channels as soon after they are published on your website, or with the selected time delay.

Please note:

- The Auto-Poster settings for imported RSS-feeds will automatically share the imported posts that are published directly on your website. For RSS-feed posts that are imported **as drafts** the auto-posting will be triggered by the general auto-poster settings for new and updated posts from your website ([See instructions above](#))
- In most RSS-feed plugins you can specify a WordPress author / user account for the RSS-feeds import. **Make sure that the auto-poster settings are enabled in the same author account for which the RSS-import** is specified. As Blog2Social operates user-based, the auto-poster settings can be configured individually for each user account.
- **X (Twitter):** Due to the [new guidelines and cross-posting terms of Twitter](#), users are no longer allowed to post identical or substantially similar content to multiple accounts multiple duplicate updates on one account. The ["Customize & Schedule" feature](#) allows you to publish your posts on several Twitter accounts at the same time by varying the comment texts.
- **Facebook profiles:** Due to Facebook's new API guidelines, auto-posting on Facebook Profiles is restricted for social media tools or apps. With [Facebook Instant Sharing](#), we provide you with an alternative option to share your posts with Blog2Social on your Facebook Profile. Auto-posts for Facebook Profiles are saved in the "Instant Sharing" tab in your navigation bar under "Posts & Sharing" and can be sent to your Facebook Profile by clicking the "Share" button next to the post.
