

Auto-Posting, Sharing and Re-Sharing

How to share content from any text, link, image or video on Social Media with Blog2Social

Sharing content from links, images, videos or creating your custom text posts will add more value and variations to your own social media content. Presenting relevant content from other sources will also help establish your social media accounts as a valuable resource for your particular field of expertise.

You can automatically post and schedule content from any source with Blog2Social, in addition to automating the social media marketing of your own blog posts and WordPress websites. This way, you can organize your complete social media scheduling right from your WordPress dashboard.

How to share and schedule custom posts posts with Blog2Social

Click on "**Share Posts**" in your Blog2Social WordPress dashboard. Then click on "**Create a new custom post**".

The screenshot displays the Blog2Social WordPress dashboard. On the left sidebar, the 'Share Posts' menu item is highlighted with a green arrow. The main content area is titled 'Share Posts' and contains two primary options: 'Share existing WordPress content' and 'Create a new custom post'. The 'Create a new custom post' option is highlighted with a green box and a green arrow pointing down to it. Below these options is a form for creating a new post, including a title field, a text area for content, and buttons for 'Image', 'Video', 'My Profile', 'Advanced settings', 'Customize', and 'Share'. A 'LIVE PREVIEW' section on the right shows a preview of the post with the Blog2Social logo and social media interaction buttons (Like, Comment, Share).

You can create social media posts using **links**, **text**, **images**, or **videos**. To share a link, simply copy and paste it into the box. You can share your favorite websites, articles, images from your device, or video files and links.

Auto-Posting, Sharing and Re-Sharing

Publish directly to your standard social media accounts, or select a pre-defined [network collection](#) tailored to your current activity.

Click "**Share**" to publish your posts immediately, or use "**Advanced settings**" to schedule them for later.

Tailor your posts individually by clicking on "**Customize**".
