

Auto-Posting, Sharing and Re-Sharing

How to share videos on Social Media?

Videos are one of the most engaging forms of content on social media, capturing attention quickly and boosting visibility.

With Blog2Social, you can easily post and schedule videos across multiple social media platforms at the best times, increasing reach and engagement. Furthermore, Blog2Social ensures that your videos are perfectly optimized for each social media network, saving you time and effort. Instead of manually uploading content, you can plan ahead and focus on more important tasks.

To upload videos on your social media accounts, please click on "**Share Videos**". Here you can choose if you want to share a video link or a video file:

- 1) You can either enter a video link (for example, from YouTube or Vimeo).
- 2) You can upload a video from your media library or from your computer.

	Best-Times-Video-Short-EN.mp4 (Format: video/mp4, Size: 23.13 MB, Length:50s) 2 shared video posts, latest upload by Jan on 24.07.2026 12:00 clock uploaded by pdc on 19.02.2026 12:21 clock	Share on video networks	Details
	9-zu-16.mp4 (Format: video/mp4, Size: 11.97 MB, Length:10s) 26 shared video posts, latest upload by Jan on 08.05.2026 12:21 clock uploaded by Jan on 23.01.2026 12:46 clock	Share on video networks	Details

After clicking on "**Share on video networks**" next to your selected video file, you'll see the post preview editor. Here you can optionally customize your social media posts for each of your connected accounts, for example, with a video

Auto-Posting, Sharing and Re-Sharing

description or a personal comment.

The screenshot displays the Blog2Social interface for video sharing. At the top left, a 'Video Sharing' section shows a video player and metadata: 'Video: file_example_MP4_1280_10MG.mp4', 'Type : video/mp4 | Size: 9 MB | Length:31s', and 'Uploaded by pdc on 2023/01/05 11:13 am'. Below this, two social media sharing forms are visible. The first is for 'TESTUS' (YouTube), featuring a 'The Headline...' field, a 'Write something about your post...' text area, and a 'Hashtags' input field. The second is for 'ALEXANDER' (Vimeo), with a similar headline and text area, but it includes a warning: 'Network does not support emojis!'. To the right, a sidebar titled 'VIDEO ACCOUNTS' lists connected accounts: 'My Profile', 'BLOG2SOCIAL' (Facebook), 'BLOG2SOCIAL' (Twitter), 'TESTUS' (YouTube), and 'ALEXANDER' (Vimeo). It also includes an 'ADD MORE...' button and a 'Save network selection' button. At the bottom, a 'scroll to top' link and 'Save as Draft' and 'Share' buttons are present.

Click "**Share**" to publish your video and caption directly to social media. Once shared, you can find the sharing report for each video file by clicking on "**Details**" next to the file in the "**Share Videos**" section.

If any posts fail to publish, check the "[Notifications](#)" section within the Blog2Social menu for error details.

Supported Social Media Networks

- Facebook (Pages)
