

Auto-Posting, Sharing and Re-Sharing

How do I re-share already shared social media posts?

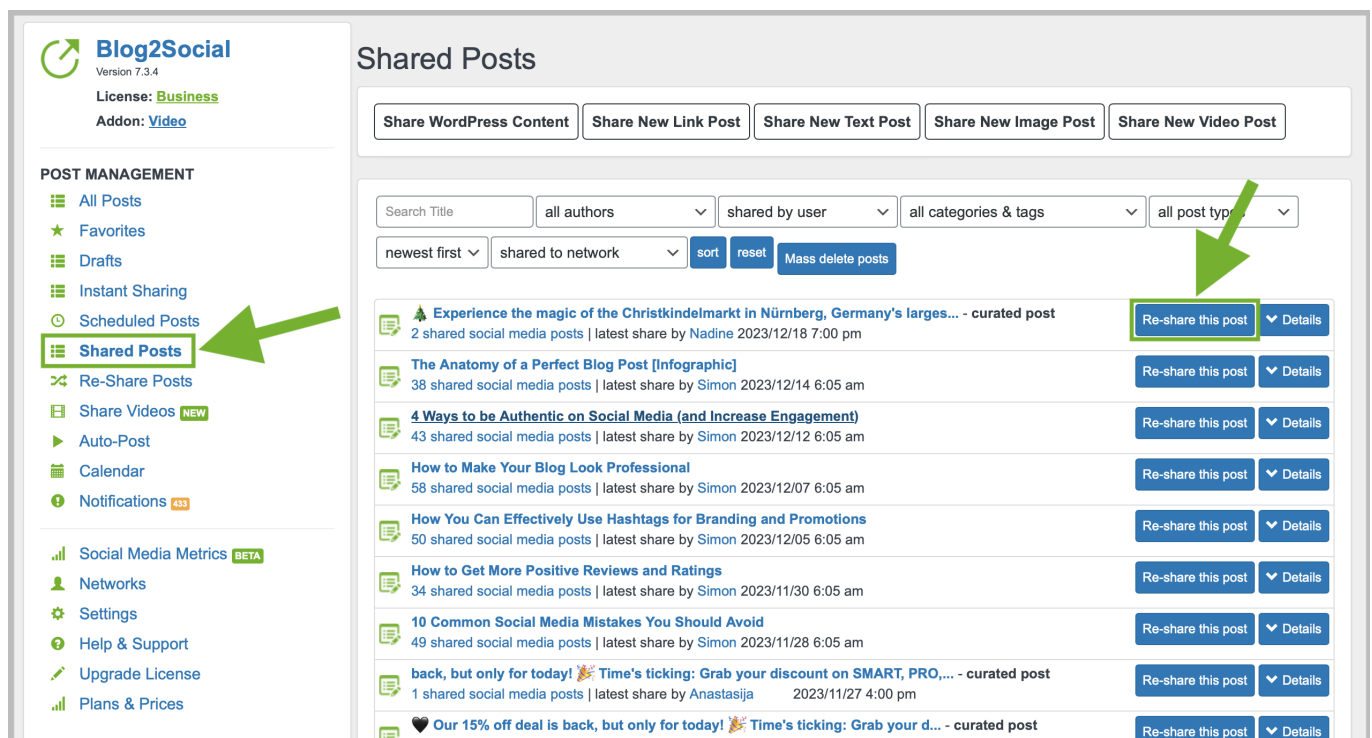

With Blog2Social, you can share and re-share your posts on your social media profiles, pages and groups as often as you like. Whether you want to re-share published posts, re-share blog posts or re-share website posts on social media, there are various ways to achieve this goal. For example, you can re-share your old posts individually.

Additionally, when using the Premium versions (Smart, Pro and Business) you can set up a [recurring scheduling scheme](#) or [share blog posts automatically](#) to ensure consistent engagement. They also allow you to [re-share your posts automatically](#), making it easier than ever to repost and keep your content active.

How to re-share already shared posts individually

To share a post that you have already shared in the past, simply follow these steps:

- 1) Go to "**Social Media Posts**" in your Blog2Social dashboard.
- 2) Click on "**Shared Posts**".
- 3) Select the post you would like to post again and click on "**Re-share this post**".

You will be forwarded to the usual Blog2Social one-page-editor. Select the networks you want to post to in the right-handed menu and customize

Auto-Posting, Sharing and Re-Sharing

your posts to your preferences. Then scroll down to the end of the page and click on "Share".

The screenshot displays the Blog2Social interface for sharing a post. At the top, there are buttons for "Load My Times Settings", "Load Best Times", and "Info". The main content area shows a post from "Blog2Social_com" on Twitter, with the text: "Authenticity on social media can be a game changer for any brand. A study shows that 91% of people 'are willing to reward a brand for its authenticity via purchase, investment, endorsement or similar action'. #Authenticity #Branding #SocialMedia". Below the text is a "Share Now" button. A "4 Ways to be Authentic on Social Media (and Increase Engagement)" card is visible. At the bottom, there are "Save as Draft" and "Share" buttons. A green arrow points to the "Share" button.

Done! You have successfully shared an already shared social media post once again!

If you want to schedule multiple individually customized posts, please take a look at this guide:
