

Customizing Social Media Posts

How to share multiple images in one Social Media Post?

Photos and graphics are an essential asset of content marketing. Visual content is an eye catcher. Images are irresistible for the reader to look at your social media posts. Images do not only amplify text messages, they also communicate on their own. They attract more attention, can evoke emotions and trigger associations.

Sharing more than one image in a post improves the visibility of your content. You can create image series, show sequences, and level up your storytelling.

With Blog2Social you can easily share multiple images in one post (image post) on the following social media networks:

- **Facebook Pages** - Up to 4 images
- **X (Twitter)** - Up to 4 images
- **Instagram Business** - Up to 10 images
- **LinkedIn** - Up to 4 images

- **TikTok** - Up to 10 images

To do this, you have two options:

- 1)** selecting a WordPress post that was already published on your website
- 2)** creating a new image post

Please click on "**Social Media Posts**" in your Blog2Social menu. Now you can choose your preferred WordPress post and click on "**Share on Social Media**" or click on "**Share New Image Post**" -> "**Customize & Schedule**" to create a new social media post.

Customizing Social Media Posts

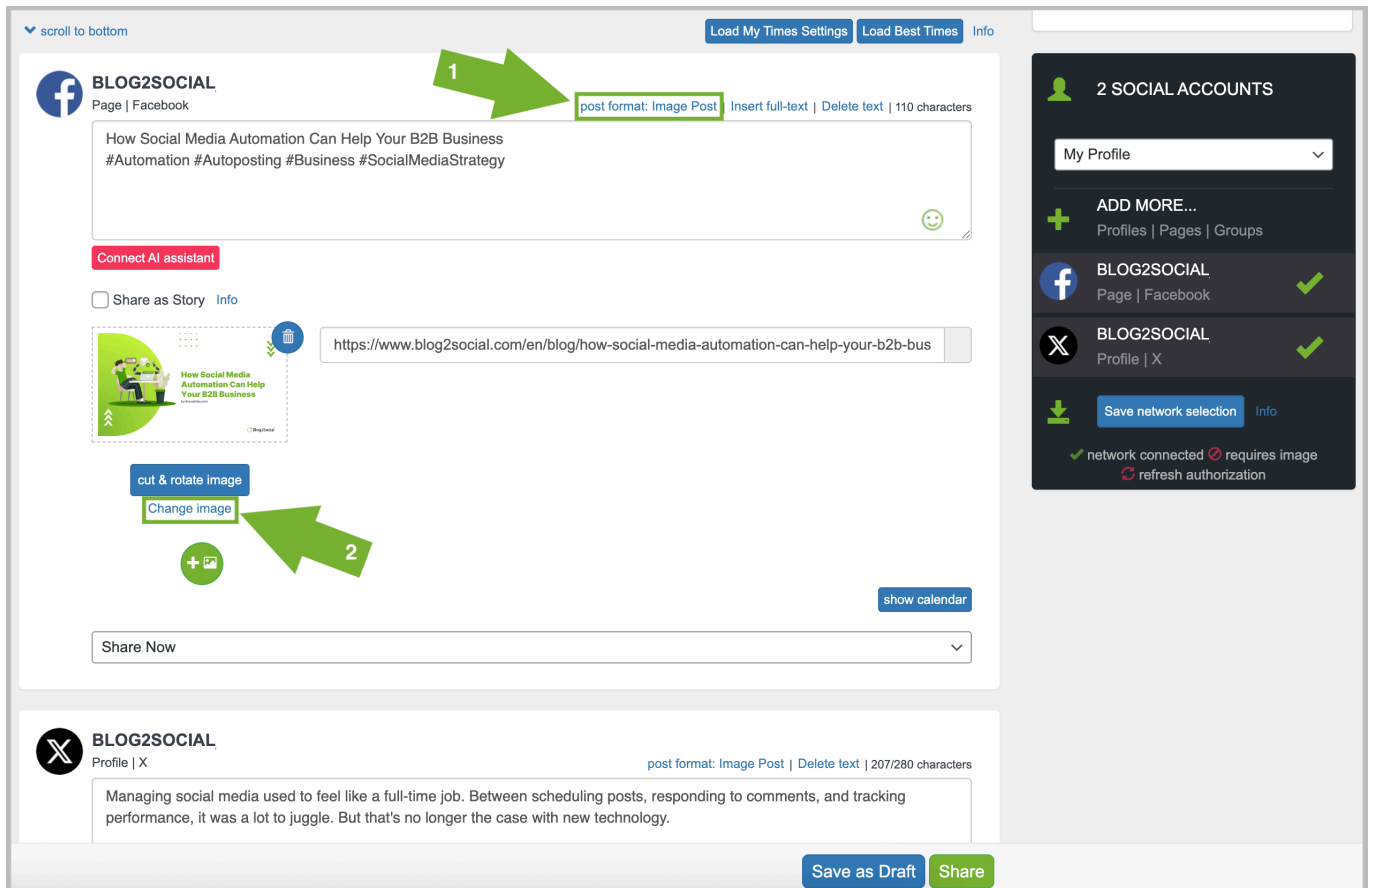

The screenshot displays the Blog2Social dashboard. On the left is a dark sidebar with navigation items like 'Dashboard', 'Posts', 'Media', and 'Social Media Posts' (highlighted with a green box and arrow). The main area is titled 'Social Media Posts' and contains a top bar with buttons for 'Share WordPress Content', 'Share New Link Post', 'Share New Text Post', 'Share New Image Post' (highlighted with a green box and arrow), and 'Share New Video Post'. Below this is a search and filter section with dropdowns for 'Search Title', 'all authors', 'shared by user', 'all categories & tags', and 'all post types'. A list of posts follows, each with a star icon, title, author, and 'Share on Social Media' button. One post, 'How Social Media Automation Can Help Your B2B Business', has its share button highlighted with a green box and arrow.

Now you can see the Blog2Social post preview and start editing your post.

Please note: To share your post with multiple images on Facebook, X and LinkedIn please change the **post format** from "**Link Post**" to "**Image Post**" first.

If your WordPress post or page already contains an image, it will be shown as the first image of your gallery. If you like to change it, you can click on "**Change image**" and select another image from your post gallery or select or upload another image from your media gallery.

Customizing Social Media Posts

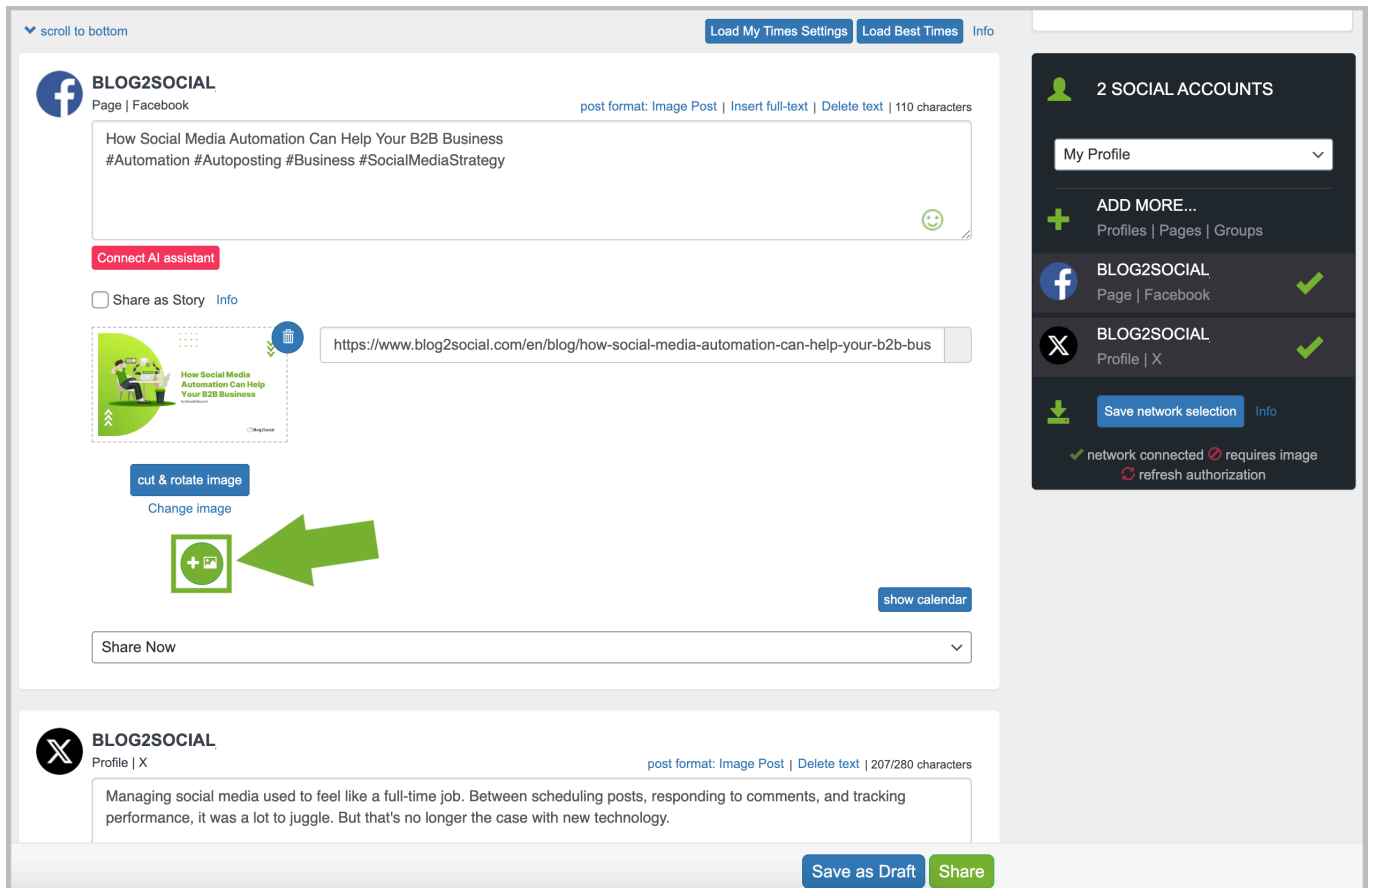

Step 3:

Add more images for your multiple-image post.

To share more than one image, you can click on the green button with an image icon below your gallery image.

Customizing Social Media Posts

A window will open, where you can choose between
1) the images from your blog post if available or
2) upload an image from your media gallery.

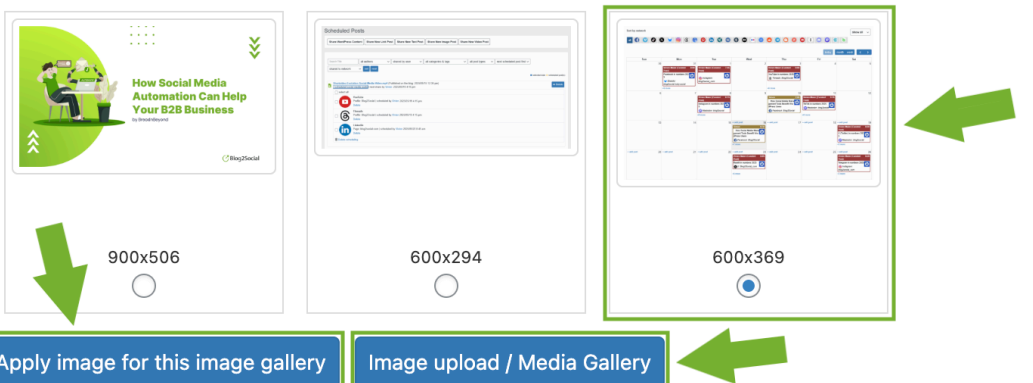

When you have chosen an image, you can click on **“Apply image for this image gallery”**.

Now your gallery contains 2 images.

Customizing Social Media Posts

Select image for  blog2social ✕

Sharing more than one image improves the visibility of your content. You can create image series, show sequences, and level up your storytelling. With Blog2Social you can share up to 10 images per post on Instagram, up to 4 images in one post on Facebook (page and group) and Twitter. The best size for images in social media posts are between: 667-1000px X 523-1000px. Blog2Social will automatically resize your image according to the requirements of each network. Changes to the image for link-posts will apply to the image for all networks with link-post settings for this post.

Apply image for this image gallery

Image upload / Media Gallery

To add more images, you can repeat these steps until you have selected the maximum number of images allowed (typically 4-10), depending on the requirements of the social platform where you plan to share your posts.

When you have completed your post gallery and you are happy with your post, you can click on **“Share”**.
