What is the best image size for Twitter posts?

All networks are different and follow different rules when it comes to images sizes.

To prevent your images from appearing pixelated or not at all you should make sure to consider each network's individual requirements for image sizes. Images that are too large or too small might appear blurry or will not be posted at all.

The infographic features a blue vertical bar on the left with the Twitter logo and the word 'Twitter' written vertically. The background is light blue with a wavy pattern. Three white boxes with black borders contain the following information:

- COVER PHOTO**
Ideal: 1500 x 500 px
Minimum: 1024 x 280 px
- PROFILE PICTURE**
Ideal: 400 x 400 px
- LINK- & IMAGE POST**
Ideal: 1024 x 512 px
Minimum: 440 x 220 px

At the bottom, there is a green footer with the text 'Blog2Social Smart Social Media Automation for WordPress and as WebApp' and several icons: a gear, a calendar, a megaphone, and a group of people. The footer also includes the copyright notice '© 2020 | Adenion GmbH', the website 'www.blog2social.com', and the 'Blog2Social by ADENION' logo.
