

Connecting Social Networks

I cannot connect Blog2Social to Facebook groups, why?

You can connect any Facebook group to your Blog2Social. Only requirement is a membership of your personal Facebook profile in the respective groups.

If you have trouble connecting Blog2Social to your Facebook groups, please make sure

1. That you have connected the right Facebook profile, which is a member of the the respective Facebook group
2. That you have not yet connected the total number of network accounts possible in your Blog2Social license version

Please see our FAQ: [How do I connect Blog2Social with Facebook groups?](#) for a step by step guide on how to connect to Facebook groups.

You can also use Facebook Instant Sharing to share in groups and events using your Facebook profile. [Learn how to use all the new features of Facebook Instant Sharing including posting in events and groups!](#)

Please note: Group administrators need to add third-party apps in the group settings. Please add the Blog2Social app to the group settings of your own groups. If you want to post to a group you are a member of, please ask your group administrator to add the Blog2Social app to the group settings. [Learn how to add the Blog2Social app to your Facebook group.](#)
