

Customizing Social Media Posts

How do I add emojis to my social media posts?

Emojis are a good way to give your posts a personal and emotional touch. It's possible to use emojis on Twitter, Facebook, LinkedIn, XING, Tumblr, Medium, Instagram, Pinterest, and Flickr.

Blog2Social offers 2 general options to integrate emojis in your social media posts:

1. Copy and paste the emojis into your posting text in the one-page preview editor.
2. If you have used emojis in your blog post, Blog2Social will use these emojis for the preformatted social media posting texts.

Please take care to use font-based emoji galleries. If you use image-based galleries Blog2Social will show the emojis in your blog post in the image selector in the preview editor.
