

Troubleshooting for Error Messages

How to check your blog settings with the Troubleshooting-Tool

With every new feature, new questions arise. The Troubleshooting-Tool helps you with conflicts that can be caused by the system settings of your blog. This way you can see independently your settings on WordPress at any time. Here is how to use the Troubleshooting-Tool.

Please note: Only system administrators can access the Troubleshooting-Tool. If you don't have admin rights, please ask your system administrator to run the Troubleshooting-Tool for you.

First click on **"Help & Support"** in the left menu bar. Then click on **"Troubleshooting-Tool"**.

The screenshot shows the Blog2Social interface. In the left sidebar, the 'Help & Support' menu item is highlighted with a green box and an arrow. The main content area displays the 'Help & Support' page, where the 'Troubleshooting-Tool' tab is selected and highlighted with a green box and an arrow. Below the tabs, a table lists system settings with 'Needed' and 'Current' columns.

	Needed	Current
Blog2Social Version	6.0.0 or higher	7.1.1
Wordpress Version	4.7.0 or higher	6.1.3
Wordpress Heartbeat	✓	✓
PHP Version	5.5.3 or higher	8.1.16-he.0
PHP Curl	✓	✓
PHP mbstring	✓	✓
PHP Dom	✓	✓
MySQL Version	5.5.3 or higher	8.0.32
Hotlink Protection (disabled)	✓	✓
OpenSSL	✓	✓
Plugin Warnings:		

Here you get an overview of the necessary and your current settings on WordPress. The following settings are displayed:

- Blog2Social Version
- Wordpress Version
- Wordpress Heartbeat
- PHP Version
- PHP Curl

Troubleshooting for Error Messages

- PHP mbstring
- PHP Dom
- MySql Version
- Database Rights
- Hotlink Protection (disabled)
- OpenSSL
- Plugin Warnings

If one of your settings does not meet the necessary requirements, this will be displayed now.

Please note that "**Plugin Warnings**" displays each plugin which could cause issues depending on its settings. If you're not facing any issues in Blog2Social, you can ignore these warnings.

You can download your results by clicking on the download symbol in the upper right corner. This way you can send the text-file to our support team.
