

Troubleshooting for Error Messages

Pinterest has blocked my account

Solution 1: Please log in to your Pinterest account. Confirm possible confirmation queries and change your password if it is requested by Pinterest.

Solution 2: Pinterest has blocked all links made with a url shortner. For details, please see the official statement of Pinterest "[Blocked links and websites](#)". We have already adapted those changes at Blog2Social. By now, Blog2Social uses the original link to your post. This way, the plugin works according to the guidelines of Pinterest.
